

We are introducing a novelty in our product line: **PRACTIC STAIR TREADS**

PRACTIC stair treads are designed to meet the requirements of the respective European standard and to provide excellent user properties together with light construction. This model series is our most versatile product, suitable for a wide range of application – from simple structures to projects with elaborate design.

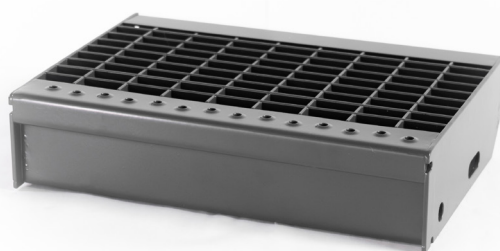

Key advantages of the PRACTIC series:

- Favourable price.
- Reduced weight: Easy handling and installation.
- Modern design: Attractive look for any environment.
- Wide range of use: Suitable for various applications.
- Increased safety: The rectangular mesh is oriented perpendicular to the direction of walking.
- The same connection/mounting holes allow for replacement of the original steps.

Visit our showroom in Chrudim and see our stair tread line in person. Come see the quality of PERFO LINEA products with your own eyes and take the unique opportunity to get detailed information from our experts.

Practic 33 × 11 mm

Practic 33 × 16.5 mm

Practic 25 × 25 mm

Practic 33 × 33 mm anti-slip

CLASSIC STAIR TREADS

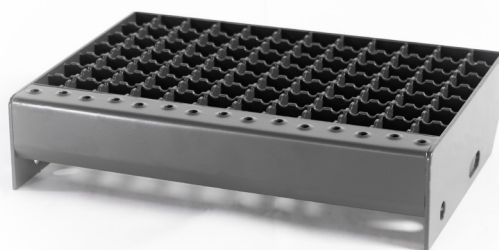

PERFO LINEA primarily offers the most commonly used pressed designs, suitable for a wide range of applications, complemented by industrial welded types. Our portfolio also includes stair treads made from expanded metal, which not only provide an attractive design but also offer excellent anti-slip properties while preventing ladies' heels from getting stuck. Additionally, special treads with deep perforations offer a distinctive aesthetic appearance, making them particularly suitable for modern architectural interiors.

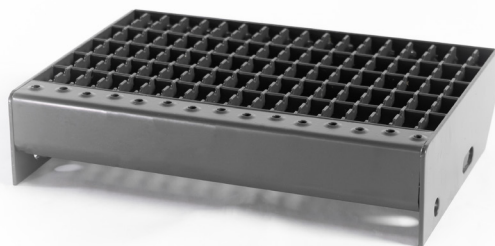

The manufactured stair treads consist of a pressed or welded grid (which can also serve as a load-bearing system), an anti-slip tread edge, optionally covered with decorative materials, and mounting side plates. The mounting side plates with holes are designed for installation onto support profiles (stringers).

Classic 33 × 11 mm

Classic 33 × 16.5 mm anti-slip

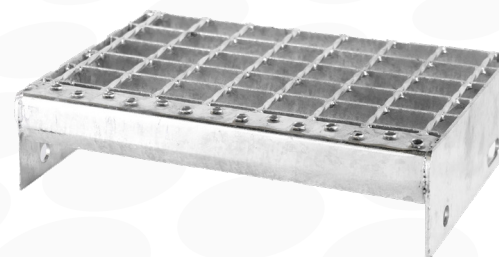

Classic 25 × 25 mm anti-slip

Classic 33 × 66 mm

Classic stainless tread 33 × 16.5 mm

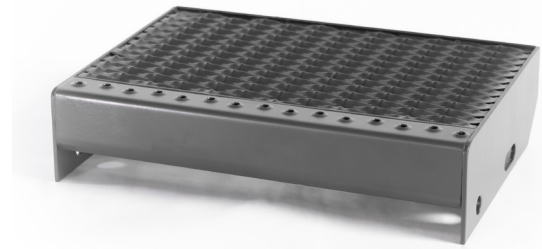

Welded grid tread

Stair treads made to order:

Your specific requirements are not an obstacle for us. We manufacture special stair treads in non-standard shapes and sizes. We can create grids with bevels or cut-outs for pipes and other conduits. We are happy to accommodate your non-standard needs. Professional consultation with our trained sales staff is, of course, available.

● WHY PERFO LINEA?

1. INDIVIDUAL APPROACH TO CUSTOMERS

prompt friendly communication, respecting wishes and professional approach

2. CONSULTING SERVICE

professional consultations, assignment solution and troubleshooting

3. HIGH PRODUCT QUALITY

in compliance with valid technical standards, established regular service of the new machine fleet and tools, time-tested production processes and output inspection

4. WIDE PRODUCT RANGE

perforated sheets, expanded metal, steel grates and stair treads, wire conveyor belts and products made of perforated material

5. CUSTOM PRODUCTION

we will resolve your demand; we are flexible to manufacture unusual products as well

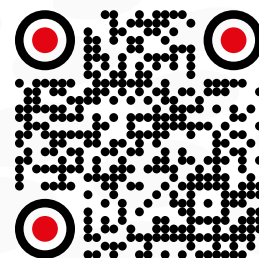

6. PRODUCTION RATE

we will meet your deadline based on our mutual agreement

7. TRANSPORTATION

Your orders are processed within 24 hours on business days. The goods are usually delivered within three business days; we are happy to arrange express delivery
